2 x 65 g - 2 x 80 g

Since 1994, Blasercafé has been offering special products for airlines, cruiselines and railways. Many prestigious companies all over the world have become our customers since. Every customer chooses with us his own, most appropriate coffee blend which suits both to passengers' tastes and to the water supply available at the main hub.

## Customised products

Each customer determines with us his own, best suited coffee blend, which is matched to both the passengers and the water at the Main Hub. We also advise on trends in coffee consumption.

The formats and fillings of the portions are adapted to the individual technical and sensory needs of the customers. Every new product is thoroughly tested by us.

## Our services at a glance

- Pillows (rectangular and round) for all common aircraft coffeemakers (B/E Aerospace, Zodiac Aerospace, Iacobucci HF Aerospace etc.), vacuum packed in polyaluvul foil (perfect flavour guaranteed)
- E.S.E. Pods (7 g portions, packed in a protective atmosphere)
- Sachets with ground coffee for coffee pots
- Sachets with dry-frozen coffee via partner company
- Coffee beans for lounges (also individualised possible)
- All packaging is printed with application instructions and individual specification

## Food safety & quality control

Our green coffees are purchased with a few exceptions directly from the estate in the origin and are thus traceable. Each production lot is recorded with all the details and inspected before departure.

## Certification

Our company is certified according to the international FSSC22000 standard for food safety. Our coffee blends are also available with Halal, UTZ, Kosher, Organic, Fairtrade and CSC certificates. Special reports on request.
